

One master brand over two sub-brands. Navy carries the AIRO identity across every surface; Essentials and Health Hub each own a voice beneath it. Every token here resolves to the same value in Flutter and in CSS.

01 The Mark

The wordmark is the primary asset on every platform. The counter-swoosh in the **A** and the circled numeral **1** replacing the final **O** are the two things that make it recognisable — neither may be redrawn or substituted with type.

The AIRO 1 logo is displayed in navy blue on a white background.

NAVY ON WHITE — primary

The AIRO 1 logo is displayed in navy blue on a light beige (linen) background.

NAVY ON LINEN — app
background

The AIRO 1 logo is displayed in white on a dark navy background.

WHITE ON NAVY — splash, app
icon, footer

Clear space

Keep free space equal to the height of the circled 1 on all four sides. Nothing crops into it.

Minimum size

28 px tall on screen, 10 mm in print. Below that the swoosh in the A closes up.

Grounds

Navy on light, white on navy or photography. Never navy on green, red, or a busy image.

Never

Recolour, stretch, outline, add shadow, rotate, or re-set “AIRO 1” in a typeface.

Three tiers. Navy is the master brand and owns the identity plus all shared chrome. Forest & Gold belongs to Essentials, Brick to Health Hub. A shared neutral scaffold holds all three together, and semantic colours stay strictly functional.

● MASTER BRAND — NAVY

			
Navy #25225E Logo, auth, nav, footer, account surfaces	Navy Dark #191742 Pressed states, gradient end, web footer	Navy Soft #3A3680 Gradient start, hover on dark	Navy Tint #E9E8F0 Icon wells, avatars, quiet panels

● SUB-BRAND — ESSENTIALS (FOREST & GOLD)

			
Forest #173A2B Primary for grocery commerce	Forest Dark #0B241A Gradient end, pressed	Sage Tint #E8F0EA Product wells, light fills	Gold #B98A34 Badges, eyebrows, price accents
			
Gold Soft #D4AF6A Text/icons on filled Forest	Gold Tint #F7EDD8 In-progress status pills		

● SUB-BRAND — HEALTH HUB (BRICK)

		
Brick #8C2F2F Pharmacy, Care, Chair, Nutrition, Membership	Brick Dark #5C1F1F Pressed, gradient end	Brick Tint #F5E6E4 Icon wells, light fills

● NEUTRALS & SEMANTIC

 Linen #F7F6F1 Page / app background	 Paper #FFFFFF Cards, sheets	 Ink #1A1E1B Primary text	 Moss Grey #767F76 Secondary text, captions
 Hairline #EBE8DF Borders, dividers	 Signal Red #B3261E Errors only — never brand	 Signal Green #2E7D32 Success, delivered	

Contrast. Navy, Forest and Brick all clear WCAG AA at 4.5:1 against Paper and Linen for body text. Gold #B98A34 does *not* — use it for ≥ 16 px bold, badges and icons only, never small body copy.

03 The Vertical Rule

Colour is navigation, not decoration. Navy tells a user where they are in the *product*; green and red tell them which *business* they're in. This holds identically in the app and on the website.

● NAVY — MASTER BRAND

AIRO ONE itself

Everything belonging to the account or the company rather than to a storefront.

04 Typography

Helvetica Neue across both platforms, carried by weight and scale rather than a second typeface. The app and the web share one system with two scales — web steps up because the viewport does.

```
/* the stack — identical on both platforms */  
font-family: "Helvetica Neue", Helvetica, Arial, sans-serif;
```

APP SCALE (IOS & ANDROID)

eyebrow	FREE DELIVERY	11 / 700 / +1.4
h1	Welcome	27 / 700 / -0.3
h2	How can we help you today?	20 / 700 / -0.2
h3	Airo Atta — 5 kg	16 / 600
body	Medicines delivered to your doorstep.	14 / 400

caption	2 of 8 chair visits used	12 / 500
label	BEST SELLERS	11.5 / 700 / +1.1

WEB SCALE (DESKTOP – SCALE DOWN ONE STEP AT ≤768 PX)

display	All of Airo, in one app.	52 / 800 / -1.6
h1	Three engines. One platform.	38 / 700 / -0.8
h2	Membership & Growth	27 / 700 / -0.4
h3	Airo Minute Clinic	19 / 600
body	Grocery, pharmacy, consultations and a living health record.	16 / 400 / 1.6
small	Pre-execution · Confidential	13.5 / 400

Body copy holds a 60–70 character measure on web (max-width: 65ch). Headings take text-wrap: balance.

05 Space, Radii & Layout

A single 4-point spacing scale drives both platforms. Corners share one curve, ending in the true pill used on every button and chip.

SPACING — SHARED

*Web only — vertical rhythm between page sections.

Shadows are tinted toward Navy Dark, never neutral black — that's what keeps surfaces reading warm rather than muddy.

06 Components

Every component takes its colour as a parameter rather than hard-coding one, so the same button renders in whichever voice mounted it. Web sizes step up ~2 px and gain hover states; the shape language is identical.

BUTTONS — WEB

CATEGORY CHIPS

STATUS PILLS

ICON TREATMENT — THE TINTED WELL

Every icon sits in a 10 px-radius square tinted at ~10% of its tier's colour. Never a bare icon on white — this single pattern is what visually unifies app and web.

07 Token Map

The contract between platforms. A token means the same thing in Dart and in CSS — if a value changes, it changes in both columns or the system has drifted.
